

FlexiHemp

Pelletised Hemp with MSM & Turmeric

- Feed ingredient
- Supports normal joint function
- Low sugar and starch, high fibre
- For horse use only

What is FlexiHemp?

This unique pelletised formula includes Hemp Hulls and Hearts, MSM and Turmeric. FlexiHemp contains the hulls, and hemp seed which provides hemp oil, fibre, amino acids, and essential fatty acids. The benefits may include joint support, skin support, muscle recovery and supporting the inflammation response.

MSM is known for its anti-inflammatory properties and its role in maintaining healthy connective tissue, cartilage, bones, and hooves.

Turmeric Alleppey has been demonstrated to help with inflammation and skin conditions.

Piperine, in black pepper blocks curcumin excretion by the liver increasing curcumin bioavailability.

FlexiHemp is beneficial for all horses, especially older horses, horses in work or in recovery. It is low in sugar and starch therefore valuable for equines with metabolic conditions, grain intolerances, or for high fibre/low NSC diets.

Feeding Guidelines

1 cup = 160g

160g/day based on a 500kg horse

Can safely be increased as required

Add to feed, split into two feeds where possible

Safe for horses or ponies with metabolic issues

May contain traces of THC.

Ingredients

100% Australian grown and processed Hemp Hulls and Hearts, MSM (methylsulphonylmethane), Turmeric Alleppey, and Black Pepper.

Suggested Product Combinations

VitaStance - High quality vitamin, mineral and amino acid mix to maintain general health of horses of all ages

Sizes Available

5kg

About The Ingredients

Hemp Hulls and Hearts are an excellent source of-quality protein (20%) which supports muscle function, nutrient absorption, and other important body functions. It also contains a superior amino acid profile with 9 essential amino acids required for protein production. These amino acids are not made by horses but are vital for their health especially for the building, fuelling, recovery of muscles after exercise, and building topline.

Hemp Hulls and Hearts contain 10% to 20% oil, mostly in the form of essential fatty acids which have anti-inflammatory benefits which support joint and immune system function.

Hemp oil provides Gamma Linoleic Acid (GLA). GLA in humans has been linked to supporting female hormonal imbalances, and improved brain function.

Hemp Hulls and Hearts are low in sugar and starch with useful levels of digestible fibre (approx. 30%), favourable for a high fibre, low sugar and starch diets. It can be fed to all horses including those with grain intolerances or metabolic issues.

Hemp Hulls and Hearts also contain antioxidants in the form of Vitamin E plus magnesium, zinc, phosphorus, and calcium. They are Australian grown and processed and GMO free.

MSM (Methylsulphonylmethane) is a natural form of sulfur that may help to minimise oxidative damage and inflammation, helping maintain healthy connective tissue, cartilage, bones, and

hooves. It is an important addition to any horse's diet. MSM also supports healthy skin and coat due to its role in keratin formation.

Horses in heavy work, are older, have arthritis or have poor hoof condition will potentially benefit from MSM in their diet.

Turmeric Alleppey and Black Pepper Curcuma longa (Alleppey), is a traditional type of turmeric commonly used in cooking, foodstuffs, cosmetics, and medicine. It may assist with conditions such as inflammation and skin conditions. It is a high potency Turmeric.

Curcumin is treated as a foreign substance by the liver, therefore rapidly metabolised and excreted. Piperine in black pepper blocks curcumin excretion by the liver increasing curcumin bioavailability. Turmeric must be stored in a sealed container, away from sunlight to maintain the efficacy of the black pepper.
