

FlexiHemp®

Pelletised Hemp with MSM & Turmeric

- Feed ingredient
- Low sugar and starch
- High fibre, protein and oil
- Suitable for horses and ponies with metabolic issues
- For horse use only

What is FlexiHemp?

This unique pelletised formula includes Hemp Hulls and Hearts, MSM and Turmeric. FlexiHemp contains the hulls, and hemp seed which provides hemp oil, fibre, amino acids, and essential fatty acids. The benefits may include joint support, skin support, muscle recovery and supporting the inflammation response.

MSM (methylsulphonylmethane) is known for its anti-inflammatory properties and its role in maintaining normal connective tissue, cartilage, bones, and hooves.

Turmeric Alleppey has been demonstrated to support normal inflammation and skin conditions.

Piperine, in black pepper blocks curcumin excretion by the liver and may increase curcumin bioavailability.

FlexiHemp is beneficial for all horses, especially older horses, horses in work or in recovery. It is low in sugar and starch therefore valuable for equines with metabolic conditions, grain intolerances, or for high fibre/low NSC diets.

Feeding Guidelines

1 cup = 160g

160g/day based on a 500kg horse

Can safely be increased as required.

Add to feed, split into two feeds where possible.

Safe for horses or ponies with metabolic issues.

May contain traces of THC.

A 5kg FlexiHemp will last a 500kg horse 31 days.

Suggested Product Combinations

VitaStance - High quality vitamin, mineral and amino acid mix to maintain general health of horses of all ages

Ingredients

100% Australian grown and processed Hemp Hulls and Hearts, MSM (methylsulphonylmethane), Turmeric Alleppey, Black Pepper.

Sizes Available

5kg

About The Ingredients

Hemp Hulls and Hearts are an excellent source of quality protein (20%) which supports muscle function. It also contains a superior amino acid profile with 9 essential amino acids required for protein production. These amino acids are not made by horses but are vital for their health especially for the building, fuelling, recovery of muscles after exercise, and building topline.

Hemp Hulls and Hearts contain 10% to 20% oil, mostly in the form of essential fatty acids which may support joint and immune system function.

Hemp Hulls and Hearts also contain antioxidants in the form of Vitamin E plus magnesium, zinc, phosphorus, and calcium. They are Australian grown and processed and GMO free.

MSM (Methylsulphonylmethane) is a natural form of sulfur that may help to minimise oxidative damage and inflammation, helping support normal connective tissue, cartilage, bones, and hooves. It is an important addition to any horse's diet. MSM also supports healthy skin and coat due to its role in keratin formation.

MSM can safely be fed to horses in heavy work, are older, have arthritis or have poor hoof condition.

Turmeric Alleppey and Black Pepper Curcuma longa (Alleppey), is a traditional type of turmeric commonly used in cooking, foodstuffs, cosmetics, and medicine. It may support normal inflammation and skin conditions.

Curcumin is treated as a foreign substance by the liver, therefore rapidly metabolised and excreted. It is reported that Piperine in black pepper may block curcumin excretion by the liver and may increase curcumin bioavailability.
