

GTP®

Growth Topline Performance

- Promotes muscle integrity and definition
- Supports normal cardiovascular, immune and neurological functions
- Supports performance and endurance
- May reduce free radical damage

What is GTP®?

GTP is a premium blend of vitamins (including vitamin E and B-vitamins), essential amino acids, spirulina powder, minerals, seaweed derived calcium, fulvic acid and many more carefully selected ingredients.

The inclusion of gamma oryzanol, whey protein and tribulis powder is thought to promote muscle integrity and definition, which is important when developing topline.

The high antioxidant content in GTP may help to control free-radical production, a possible cause of fatigue and health disorders.

Amino acids that support energy and hormone production have been included, as well as MSM and glucosamine, which are essential for the support of ligaments, tendon and cartilage.

The inclusion of inositol and choline bitartrate may improve the metabolism of fat from the diet.

Feeding Guidelines

Add to feed twice daily. Based on a 500kg horse.

Daily: over 6 weeks to help build muscle condition

Morning feed: 1 x 50g scoop

Evening feed: 1 x 50g scoop

Pre-event: 5 days prior to event

Morning feed: 2 x 50g scoop

Evening feed: 2 x 50g scoop

GTP does **not** contain any prohibited substances.

A 15kg GTP will last a 500kg horse 150 days.

Safe for horses or ponies with metabolic issues. Suitable for competition.

Ingredients

B Vitamins, Vitamin E, Seaweed derived calcium, Mannan oligosaccharides (MOS) and B-glucans, Essential amino acids, Minerals, Gamma oryzanol, MSM, Whey protein, Tribulis, Inositol, Chinese liquorice powder, Silica, Potassium citrate, Betaine, Fulvic acid, Hawthorn berry powder, Glucosamine, Spirulina, Hesperidin, Magnesium proteinate

Sizes Available

1.5kg / 7.5kg / 15kg

FOR THE NATURAL ADVANTAGE™

When to use GTP®?

GTP is used in the final stages of preparation for horses in high energy disciplines such as endurance, racing, show jumping, polo, cutting, yearling prep etc. It may also be used for horses with poor appetite or who have lost condition, and horses needing to build muscle and topline.

About the Ingredients

- > **Vitamins B1, B5, B6** - May support appetite, performance, calming, growth and development
- > **Vitamin E** - Is an antioxidant which supports skin and cellular function
- > **Inositol** - Has roles in transporting fats and nerve transmission
- > **Choline Bitartrate** - Involved in the metabolism of fats and cell structure
- > **BioPlex Iron and Magnesium** - Involved in nerve and muscular functions as well as cellular function, growth, repair and calming
- > **Spirulina** - High in protein, vitamins, minerals and aminos
- > **Gamma Oryzanol** - Support for muscular repair and development
- > **Hawthorne Berry Powder** - Believed to support cardiovascular function and circulation
- > **Silica** - Important for body tissue and joint support
- > **Betaine** - Has a role in maintaining cell volume and fluid balance and may support cellular hydration
- > **Potassium Citrate** - Helpful in balancing pH and dehydration
- > **Hesperidin** - A bioflavonoid which may support circulation and normal inflammation response
- > **Chinese Licorice Root Powder** - May provide anti-inflammatory and digestive tract support
- > **MSM & Glucosamine Sulfate** - May support the production of new cartilage for joints and ligaments
- > **Fulvic Acid** - High in minerals and antioxidants
- > **DMG (Dimethyl Glycine)** - May support muscle metabolism and could assist with the build up of lactic acid
- > **Whey Protein Concentrate** - Protein for muscle support
- > **Glutamic acid** - An amino acid vital for the transmission of nerve impulses
- > **Seaweed derived calcium** - Bioavailable minerals, high in calcium and magnesium, with pH buffering properties
- > **Tribulis** - A herb believed to help support muscle mass
- > **Amino Acids** : Arginine, Tyrosine, Threonine, Lysine, Methionine, Leucine, Glutamine, Citrulline, Beta-Alanine, Carnitine for muscle and organ support
- > **Acid Buf** - A slow release of bio-available minerals, calcium, magnesium & silicon.
- > **Glycine** - Assists with joint support and has anti-inflammatory properties

Testimonial

Before

After

Shane Eden with Fairbanks Ikon using GTP for just 2 weeks.

Shane is an eventer from the Brisbane area and he uses GTP on all new horses and in the lead up to events.
