

Hepadine®

Liver and Kidney

- Helps maintain normal liver and kidney function
- Supports normal detoxification
- Helps promote proper urine mineral balance

Why use Hepadine®?

Hepadine may assist in liver and kidney function.

The liver is responsible for regulating energy metabolism, hormone production, and producing bile for aiding digestion. The kidney is responsible for regulating electrolytes, supporting normal blood pressure, filtering the blood and excreting waste.

Liver function can be compromised through the effects of toxins, infections (viruses), excessive use of medication and excess nutrient consumption. While major causes of kidney failure can be related to diabetes, possibly caused by over consumption of grain.

Feeding Guidelines

Add to feed twice daily for 10 days, repeat as required

Morning feed: 1 x 50ml

Evening feed: 1 x 50ml

Based on a 500kg horse

*Improved kidney circulation may increase urination.
Please ensure access to plenty of clean water.*

Suggested Product Combinations

Clean Culture - May support a normal digestive system and may help horses with ulcers. To be fed over 10 days

VitaStance - A balanced bio-available vitamin, mineral and amino acid blend

Ingredients

A proprietary blend [Inositol, Choline bitartrate, Fulvic acid, Sea minerals, Astragalus, Moorlife, Methionine, Sodium benzoate] 100ml

Sizes Available

1L

About the Ingredients

Methionine, inositol and **choline bitartrate** are all members of a group of nutrients called lipotropics. A lipotropic nutrient promotes or encourages the export of fat from the liver. Lipotropics are necessary for the maintenance and support of a normal liver.

Methionine is one of the essential amino acids. It is not synthesised by the horse's body and must be sourced from the diet. It is involved in the detoxification reactions in the liver.

Astragalus may support the immune system and assist liver metabolism. It is also thought to strengthen kidney circulation, making it useful in early stages of kidney infection.

Fulvic acid is an organic compound that may assist detoxification by neutralising pesticides, herbicides and other poisons.

Testimonial

"I have recently tried the **Hepadine** on Noddy, my main showjumper, and I'm so amazed with the results. Noddy suffers from sore kidneys quite often after big shows so I thought it would be the perfect product to try. He was back feeling great after just a few days on it (but I carried on to finish the 10 day course). His coat is so smooth now that he almost looks bald. **Fantastic for a horse that usually suffers from dry skin etc and is now looking amazing all the time.** Thanks for another great product!" **Emily, 2017**
