

HemaSol®

Herbal Support for Heart and Lungs

- Helps muscle function and fluid balance
- Helps maintain normal cardiovascular function
- Supports normal blood pressure
- Supports vascular health

What is HemaSol®?

HemaSol is a herbal blend designed for daily supplementation to support vascular function in horses during exercise. Exercise induced pulmonary haemorrhage (EIPH) in horses is often referred to as a "bleeding" or "bleeding attack". EIPH is most common in racing horses such as American quarter horses, thoroughbreds and standardbreds. It also occurs in disciplines where horses are exercising at a high intensity like polo ponies, barrel racers, reining horses, cutting horses, eventers and show jumpers.

Feeding Guidelines

Add to feed twice daily

Morning feed: 1 x 30g scoop

Evening feed: 1 x 30g scoop

Based on a 500kg horse

Suggested Product Combinations

GTP - Growth Topline and Performance, pre-event stamina boost

EquiPower Performance - high energy racing oil and may assist in post-event recovery.

Ingredients

A proprietary blend [Seaweed derived calcium, Fulvic acid, Magnesium Sulphate, Saccharomyces cerevisiae, Hawthorne berry powder, Silica, Magnesium proteinate, Vitamin A, Vitamin K, Vitamin C, Cara sweet flavouring] 30g

Sizes Available

1.5kg / 3kg / 10kg / 20kg

About the Ingredients

Hawthorne berry powder - may support normal vascular dilation

Vitamin A - is included for blood vessel wall health and integrity

Magnesium - is added in several forms to balance the calcium, potassium and iron levels

Vitamin K - is included to support normal blood clotting

Fulvic acid - is thought to support normal coagulation of the blood

Signs of EIPH (exercise induced pulmonary haemorrhage)

Unless a horse has severe EIPH, with blood present at the nostrils, the only definitive diagnosis can be made by endoscopic examination of the trachea.

However subtle signs may be:

- Frequent swallowing and coughing in the immediate post-exercise recovery period
- Poor appetite post-performance
- Reduced performance
