

ProMune®

Immune Support

- Immune system support
- Supports the body's innate resistance to pathogens
- Contains prebiotics

When to use ProMune®?

Horses may suffer from coughs and colds during seasonal changes, causing mucus build up, leading to chest congestion and breathing difficulties.

These breathing difficulties may result in decreased activity and performance. Horses may also experience depleted immune function after stressful events, periods of intense activity, change of season, change of location, injury, surgery or vaccinations.

Eliminating bad bacteria from the horse's system without negatively impacting the good bacteria is important for faster recovery from immune illness.

Many medically prescribed drugs can be harsh on the horse's stomach and lead to conditions such as ulcers. Promune contains all natural ingredients to assist the body in fighting the illness without further damage other internal organs.

Feeding Guidelines

Add to feed twice daily for 21 days

Morning feed: 1 x 30g scoop

Evening feed: 1 x 30g scoop

Based on a 500kg horse

A 3kg ProMune will last a 500kg horse 50 days.

Safe for horses or ponies with metabolic issues.

Suitable for competition.

Ingredients:

Methylsulfonylmethane (MSM), Saccharomyces cerevisiae (Diamond V XPC yeast), Echinacea, Astragalus, Selenium, Withania, Iron, Andrographis, Spirulina, Reishi Mushroom, Fulvic acid

Sizes Available

1.5kg / 3kg

FOR THE NATURAL ADVANTAGE™

About the Ingredients

Astragalus powder, echinacea and **withania** powder have been added as they may support the immune and nervous systems.

MSM and **reishi mushroom** may provide anti-inflammatory and antioxidant benefits.

Andrographis may improve appetite and may protect internal organs.

Diamond V yeast powder is a prebiotic that may assist digestive health.

Suggested Product Combinations

Respirite - For horses suffering from serious respiratory congestions. Combining these two may provide additional support to respiratory, immune and nervous systems. May also diminish the effects of Herpes 4 virus.

VitaStance - A balanced bio-available vitamin, mineral and amino acid mix for horses and ponies. May boost internal health and support the immune system.

Testimonial

"Wow, coming off a big few weeks completing our first two 2* events I have to say a big thank you to Stance Equitec for getting my main man Bond up and running again. Bond started this season feeling fantastic with a win at Wandin cic* in March, but then a couple of weeks later he got terribly sick with a virus, to the point where putting one foot in front of the other in the paddock was a struggle. It looked like we would be kissing this season goodbye, but I thought it was worth adding ProMune to Bond's feed (which already comprises of a number of my favourite Equitec supplements and CoolStance.) Along with a nice bit of rest,

I am amazed at how quickly he bounced back. It took about a week and he seemed his old self in the paddock, so I slowly built up his workload and he really hasn't missed a beat since!

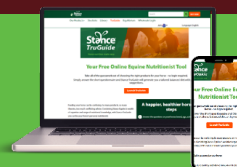

Amazingly we are now headed to Melbourne 3 day event, feeling fit and fantastic, in 2 weeks time!"

Asha Warnock, 2018
