

Placid Rein PLUS®

Nervous and Anxious Horses

- For behaviour problem management
- Helps maintain calmness
- May improve focus and attitude
- With Resveratrol

What is Placid Rein PLUS®?

Placid Rein PLUS is a unique powdered formula designed to support normal stress in horses and to help maintain a consistent attitude to work whether at home or away. Unlike Placid Rein, **Placid Rein PLUS** includes resveratrol, an anti-oxidant that may help the body detoxify of free radicals.

Placid Rein PLUS can be administered daily and long term for high strung or nervous horses. Alternatively, it may be used to help pre-event nerves.

Symptoms of nervous horses

- Excessive sweating, even in moderate climates
- Loss of condition (especially when traveling)
- Refusal to eat or drink in different environments
- Excitable and/or difficult to manage

Feeding Guidelines

Add to feed twice daily. Can be used as a daily supplement or five days prior to an event

Morning feed: 1 x 35g scoop

Evening feed: 1 x 35g scoop

Based on a 500kg horse

Ingredients

A proprietary blend [Vitamin B1, B2, B3, B5, B6, Magnesium sulphate, Magnesium proteinate, Tyrosine, Glutamic acid, seaweed derived calcium, Beta - glucans, Baikal skullcap, Yeast, Resveratrol] 35g

Suggested Product Combinations

Clean Culture - To support a normal digestive system and may help horses with ulcers. Feed for 10 days

OsmoPlex - Salt and electrolyte replacement

Sizes Available

300g / 1.5kg / 3kg / 10kg / 20kg

About the ingredients

Resveratrol has been added as an antioxidant that may help the body efficiently detoxify free radicals and may assist in decreasing inflammation.

Placid Rein PLUS contains high levels of **B vitamins** which support nervous system function.

Magnesium is included in several forms as it has a role in many processes in the body. Magnesium deficiency can cause nervous or anxious behaviour.

Seaweed derived calcium is a rich source of magnesium and calcium.

Baikal skull cap is a herb that has been used for centuries in Chinese medicine as a natural calmer.

Tyrosine is used in humans to treat anxiety.

Saccharomyces cerevisiae (yeast prebiotic) is included in **Placid Rein PLUS** as there is a strong link between stress and digestive upset.

Glutamic acid is included for its role in brain metabolism.

Testimonial

“So yesterday I took Electronic Fortune to his first show jump training day since he retired from racing in Hong Kong last year. He is usually very highly strung around other horses so I always feed Equitec **Placid Rein** for training at home. I was expecting this to be quite stressful for him (the floating and the show itself) so **I switched him to the Placid Rein PLUS for 5 days before to reduce his nerves and he was impeccably behaved!** It was the first time he’s seen more than one cross rail and apart from a couple of refusals he cleared every jump with feet to spare! He also stood tied to the float all day like a pro! For extra peace of mind I recommend giving the Placid Rein PLUS a try!” **Lisa Jones, 2017**
