

UlcaBuf®

Normal Stomach and pH Support

- Helps support protective layer in the bowel
- Supports proper pH under occasional gastric distress
- Contains prebiotics and live probiotic for intestinal health

What is UlcaBuf®?

UlcaBuf is an all natural acid balancer supplement with specifically curated ingredients designed to support long term digestive function. It is formulated specifically to support the stomach and the hindgut.

UlcaBuf can be used as a long term supplement for stomach and digestive maintenance support. UlcaBuf can also be used short term (21 days) for times of stress.

Contributing Risk Factors For Ulcers

- Stress and illness
- Transportation
- High-grain diet
- Stable confinement
- Intermittent feeding/lack of forage
- Intense exercise or Racing
- NSAID use (antibiotics)
- Management changes

Suggested Product Combinations

Clean Culture: 10 day digestive aid to support gut health. May improve nutrient digestion and support beneficial intestinal microbes. Contains prebiotics.

VitaStance: A balanced bio-available vitamin, mineral and amino acid mix for all horses and ponies.

Feeding Guidelines

Please consult your veterinarian before feeding to a pregnant mare. Feeding rate based on a 500kg horse.

Maintenance:

Morning feed: 1/2 x 40g scoop

Evening feed: 1/2 x 40g scoop

Stress: for 21 days

Morning feed: 1 x 40g scoop

Evening feed: 1 x 40g scoop

A 13kg tub will last a 500kg horse on the maintenance rate 325 days.

Safe for horses or ponies with metabolic issues. Suitable for competition.

Ingredients

Curcuma xanthorrhiza, Powdered coconut oil, Seaweed derived calcium, Actigen®, Yea-SacCTS® (Saccharomyces cerevisiae), Sodium alginate

Sizes Available

250g / 2kg / 4kg / 13kg

About the Ingredients

Turmeric: Curcuma xanthorrhiza is a unique form of turmeric where research has shown that when fed to horses it may suppress the formation of stomach ulcers.¹

PowerStance (Powdered coconut oil): may assist in the absorption of the curcuma xanthorrhiza, while the lauric acid may provide anti-bacterial properties.²

Seaweed derived calcium (Acid Buf): Harvested from red algae (lithothamnion) from the ocean at the coast of Iceland. Lithothamnion has a honeycomb structure that provides a large surface area of (>10m²) per gram and a slow release of bio-available minerals, calcium, magnesium and silicon. It has a longer buffering action than limestone or sodium bicarbonate. Research shows this had a significant buffering action for 4-6 hours under simulated in vitro stomach digestion conditions and also simulated in vitro hindgut fermentation activities.³

Actigen: is a strain of yeast containing mannan oligosaccharides (MOS). MOS are considered a prebiotic and are thought to promote the growth of healthy gut bacteria. Which are believed to reduce the number of pathogenic bacteria in the hindgut. They may also boost the immune function in the digestive tract.

Yea-Sacc^{TS}: Yea-sacc is a probiotic (live microorganism) that works symbiotically with Actigen (a prebiotic) and helps promote beneficial bacteria and fibre digestion in the hindgut as well as help to stabilise the hindgut pH.

Sodium alginate: may assist in maintaining the integrity of the mucus membrane within the digestive tract.

1. Feeding turmeric (C. xanthorrhiza) reduces the severity of squamous gastric ulceration in feed restricted horses, Fletcher, S et.al. (2017), JAPAN submitted
2. Antimicrobial Property of Lauric Acid Against Propionibacterium Acnes: Its Therapeutic Potential for Inflammatory Acne Vulgaris, Nakatsuji, T et.al. (2009) J. Invest. Dermatology 10:2480-2488
3. Journal of Equine Veterinary Science. 34(3):391-397, Moore-Colyer, M. et al. (2014)

High Grain Diet = More Acid = More Ulcers

"Noddy was prone to ulcers, he never ate when he was locked up for a few days and was usually cranky at the same time. **Since being on UlcaBuf** I'm happy to say he **hasn't lost his appetite**, he **licks his feed bin clean** and **hasn't even been cranky** so I'm super happy!"
- Emily
