

# Toxin Binder

## Mycotoxins

- May bind harmful polar and non polar mycotoxins
- Contains prebiotic to support gut health
- Fast acting non medicated

### What is Toxin Binder?

**Toxin Binder** has been formulated from specifically chosen ingredients that may bind harmful mycotoxins in the horse's digestive tract during periods of high mycotoxin contamination. **Toxin Binder** is designed to bind to the polar and non-polar mycotoxins.

### What is a Mycotoxin?

Mycotoxins can be found in the fungi that grow on some grasses -mainly paspalum, rye, couch and some weeds and clover. More than 500 mycotoxins have been identified to date. They are more prevalent in hot and humid conditions (spring and summer) and can also be found in some commercial feeds and hays.

### Feeding Guidelines

Add to feed twice daily. Begin with 1tsp and gradually increase over 14 days

#### Maintenance:

Morning feed: half of 20g scoop  
Evening feed: half of 20g scoop

#### Severe condition:

Morning feed: one and a half of 20g scoop  
Evening feed: one and a half of 20g scoop

Based on a 500kg horse

### Ingredients

A proprietary blend [Alltech Mycosorb® A+ algae meal, Alltech Actigen® containing *Saccharomyces cerevisiae*, selected inner yeast cell wall, and Powdered Coconut oil (PowerStance®)] 20g

### Suggested product combinations

**Turmeric** - A blend of three varieties of turmeric, powdered coconut oil, ground black pepper and resveratrol

**ProMune** - A herbal blend which may support and boost the immune system to aid in recovery

### Sizes Available

500g / 1kg / 2kg / 6kg

## About the ingredients

**Mycosorb A+** contains two main ingredients; a specific strain of yeast and algae meal. Mycotoxins are thought to bind to this strain of yeast, thus removing them from the horse's digestive tract. The algae is also thought to target and absorb different types of toxins, removing a wider range of toxins when combined.

**Actigen** is a strain of yeast containing Mannan Oligosaccharides (MOS). MOS are considered a prebiotic and are thought to promote the growth of healthy gut bacteria. They may also boost the immune function in the digestive tract.

**PowerStance** is a powdered coconut oil. It may have antimicrobial actions from Lauric acid for optimizing gut health, maintaining appetite and normal digestive function.

## Signs of Mycotoxin poisoning

### Symptoms can vary widely but may include:

- Itchy skin and/or hairloss
- Scabby sores
- Stiffness
- String halt/staggers
- Wasted topline
- Sunburnt nose
- Persistent cough
- Odd sweating
- Coarse, dull coat
- Persistent greasy heel/rainscald
- Unexplained spookiness and dangerous behaviour

### Mycotoxin poisoning may also cause the following without any obvious signs:

- Depleted minerals in the body
- Decreased immune function
- Negative impact on the kidneys, liver and reproductive system
- Severe cases can lead to death

## Testimonial

"I had heard about toxin binders for a while through different people and equine nutrition forums but never really considered using one since my horses are lucky enough to be grazing on improved pasture. Then a few months back my thoroughbred developed scabby itchy patches along his back and down his legs and also noticeable drop in his top line. I tried many different topical treatments and washes but no change his back was hot and sore and no way I could put a saddle on him. I decided I had nothing to lose by trying **Toxin Binder** and within a week his itch was gone. I have also noticed a huge change in his overall condition and energy levels in the weeks since then. **Barry's coat is glistening and his muscle tone is the best it's ever been but even more importantly my very hot headed and sensitive horse is calm and so much happier in his work.** So incredibly happy with the results of something so simple. Barry and I are now looking forward to a great season eventing in top shape."  
**Rosie, 2017**
