

Hemp Hulls and Hearts

Cracked hemp hulls and kernels for horses

- Feed ingredient
- Supports normal joint function
- Low sugar and starch, high fibre
- For horse use only

What are Hemp Hulls and Hearts?

Hemp hulls are the shell of the hemp heart/seed that remains after the seed has been extracted. During the de-hulling process a certain percent (approx. 20%) of the seed remains, resulting in this blended Hemp Hulls and Hearts product. They are an excellent source of fibre and amino acids, and provide essential fatty acids.

Hemp in the human market is fast becoming established as a super food and has been used in food, tea and medicine in China for at least 3000 years.

Feeding Guidelines

May contain traces of THC

Introduce slowly into diet over two weeks

Feeding Rate	Grams p/day	Cups p/day
Maintenance	100 - 200g	1 - 2 cups
Performance	200 - 400g	2 - 4 cups

1 cup = 100g of Hemp Hulls and Hearts

Based on a 500kg horse

Ingredients:

100% Australian grown and processed Hemp Hulls

Sizes Available

4kg / 12kg

FEEDS FOR THE NATURAL ADVANTAGE™

Why feed Hemp Hulls and Hearts?

Hemp Hulls and Hearts are an excellent source of high quality protein (20%) which supports muscle function, nutrient absorption, and other important body functions.

It also contains a superior amino acid profile with 9 essential amino acids that horses require for protein production. These amino acids are not naturally made by the horse and are vital for a horse's health especially in regards to the building, fuelling, recovery of muscles during exercise, and building topline.

Hemp Hulls and Hearts contains between 10% and 20% oil, mostly in the form of the essential fatty acids which have anti-inflammatory benefits that may support joint and immune system function.

The hemp oil also provides a source of Gamma Linoleic Acid (GLA). GLA in humans has been linked to supporting hormonal imbalances in females along with improved brain function.

Hemp Hulls and Hearts is low in sugar and starch as well as containing useful levels of digestible fibre (approx. 30%), favourable when feeding a high fibre, low sugar and starch diet. It can be fed to all classes of horses including those with grain intolerances or metabolic issues.

Hemp Hulls and Hearts also contains anti-oxidants in the form of Vitamin E as well as Magnesium, Zinc, phosphorus and Calcium. Hemp Hulls and Hearts is a GMO free product, and is Australian grown and processed.

"FROM UNSOUND & UNRIDEABLE TO QUALIFIED FOR STATE CHAMPS"

"Our older ponies were both **rejected** for **unsoundness** and **now** are both **thriving** on **Hemp Hulls and Hearts**.

Within four months our 17yo Welsh Cob, **previously** described as '**unrideable**', has **qualified** for PC State Jumping Equitation and Interschools State Dressage Championships.

Our horses are now **glowing** and **youthful** and are **only fed hay** and **Hemp Hulls and Hearts**. No pelleted feed, supplements or medications.

We absolutely attribute a large part of the ponies' success to their simple but health-giving diet. So we're very very glad to hear the **Hemp Hulls and Hearts don't swab** as we **couldn't manage older easy-keepers without them!**" Maki
