

Hemp Hulls and Hearts

Cracked hemp hulls and kernels for horses

- Feed ingredient
- Low sugar and starch, high fibre
- For horse use only

What are Hemp Hulls and Hearts?

Hemp hulls are the shell of the hemp heart/seed that remains after the seed has been extracted. During the de-hulling process a certain percent (approx. 20%) of the seed remains, resulting in this blended Hemp Hulls and Hearts product. They are an excellent source of fibre and amino acids, and provide essential fatty acids.

Hemp in the human market is fast becoming established as a super food and has been used in food, tea and medicine in China for at least 3000 years.

Feeding Guidelines

May contain traces of THC.
Introduce slowly into diet over two weeks.

Feeding Rate	Grams p/day	Cups p/day
Maintenance	100 - 200g	1 - 2 cups
Performance	200 - 400g	2 - 4 cups

1 cup = 100g of Hemp Hulls and Hearts.
Feeding rate based on a 500kg horse.

A 12kg Hemp Hulls and Hearts will last a 500kg horse on the maintenance rate 120 days.

Safe for horses or ponies with metabolic issues.

Ingredients:

100% Australian grown and processed Hemp Hulls

Sizes Available

4kg / 12kg

FOR THE NATURAL ADVANTAGE™

Why feed Hemp Hulls and Hearts?

Hemp Hulls and Hearts are an excellent source of high quality protein (20%) which supports muscle function, nutrient absorption, and other important body functions.

It also contains a superior amino acid profile with 9 essential amino acids that horses require for protein production. These amino acids are not naturally made by the horse and are vital for a horse's health especially in regards to the building, fuelling, recovery of muscles during exercise, and building topline.

Hemp Hulls and Hearts contains between 10% and 20% oil, mostly in the form of the essential fatty acids which may support joint and immune system function.

Hemp Hulls and Hearts is low in sugar and starch as well as containing useful levels of digestible

fibre (approx. 30%), favourable when feeding a high fibre, low sugar and starch diet. It can be fed to all classes of horses including those with grain intolerances or metabolic issues.

Hemp Hulls and Hearts also contains anti-oxidants in the form of Vitamin E as well as Magnesium, Zinc, phosphorus and Calcium. Hemp Hulls and Hearts is a GMO free product, and is Australian grown and processed.

Suggested Product Combinations

VitaStance - High quality vitamin, mineral and amino acid mix to maintain general health of horses of all ages

Turmeric - A blend of three varieties of turmeric, PowerStance powdered coconut oil, ground black pepper and resveratrol

Testimonial

"Our older ponies were both **rejected** for **unsoundness** and **now** are both **thriving** on **Hemp Hulls and Hearts**.

Within four months our 17yo Welsh Cob, **previously** described as '**unrideable**', has **qualified** for PC State Jumping Equitation and Interschools State Dressage Championships.

Our horses are now glowing and youthful and are only fed hay and Hemp Hulls and Hearts. No pelleted feed, supplements or medications.

We absolutely attribute a large part of the ponies' success to their simple but health-giving diet. So we're very very glad to hear the **Hemp Hulls and Hearts don't swab** as we **couldn't manage older easy keepers without them!**" Maki
